MikroTik

Router Board Rb433
RB433

• The rb433 is a high speed AP/router. Much faster than it's predecessors the rb433 is replacing not only the low priced rb133, but also the powerful rb333.

• The heart of this device is the new Atheros CPU which makes this tiny device a quick one. Tests show that this device is faster than any other low cost product by mikrotik, making the rb400 series fit right behind rb600 and rb1000.

• RB/433 includes RouterOS - the operating system, which will turn this powerful system into a highly sophisticated router/firewall or bandwidth manager.
